

Micro Water

Carol Rose Keppler, M.El

Master Energy Intuitive

Imagine that there was a magic drink that looked like water, smelled like water and tasted like water, but was velvety smooth! Among other things, this miracle water would more easily re-hydrate your cells and rebalance your blood chemistry – both serious problems for most of us.

And when you drank it, amazing things started happening to you. Colleen, doing nothing but drinking MicroWater, had a shoulder “frozen” for years unlock, and pesticide poisoning causing hot spots on her body, clear! Jan’s operation left her with excruciating pain in her hip, but after using MicroWater said, “The pain just disappeared!” This is no futuristic fairy tale – these things are happening and more and more often with the advent of the new water technology.

The Miracle of MicroCrystalline Technology

Research has recreated the best water on earth, that of the famed Hunza land, where people were known for living active, healthy, disease-free lives for up to 130 years of age.

Microcrystalline technology is the most important discovery to date in nutrient absorption and cell-life extension. It transforms ordinary water into the best water we could possibly take into our bodies. We call it MicroWater.

What happens when we combine just 10 drops of this remarkable catalyst, **MicroEnhancer™**, with water? With *just 10 drops* the molecular structure of regular or “bulk” water (water with large clusters) is altered, transformed into a structure very similar to that of our own cellular fluid. *Now you can drink the structured water your body needs*, saving it the metabolic work normally required to change “bulk” water or regular drinking water into the cellular fluid structure your body must have for optimal function.

What are the Benefits of Drinking MicroWater?

1. This very smooth water acts as a “catalyst,” enhancing the effect of all the nutrients in the food you are eating as well as any supplements you may be taking. It actually helps the body better

absorb the nutrients – Yes! You can drink this water with your meals – it helps the digestive process.

2. The smaller clusters of water that have been micro-enhanced, pass easily through the cell walls taking along with them the nutrients and enzymes and, just as important, allowing cellular wastes to be moved out.
3. MicroWater can improve the pH of the water you are drinking to help the body regain its acid-alkaline balance, speeding up your repair process.
4. Your body can begin to dissolve acid deposits.
5. Even the bad fats and oils can be dissolved out, meaning less clogging.
6. Athletes: MicroWater improves performance by helping the body rid itself of lactic acid build-up in the muscles caused by strenuous exercise.
7. MicroWater increases the body's energy efficiency and slows the aging process.
8. MicroWater allows cells to hydrate with less water.

Now here is more good news –

MicroEnhancer™ also clears the toxic plasticisers leaching into you water from plastic bottles.

Just One 2 oz. bottle of MicroEnhancer™ contains enough formula to enhance 120 quarts of water.

How do you use **MicroEnhancer™**?

It is as easy as putting 10 drops in each quart of pure water you drink (not tap or distilled).

Drink throughout the day and feel the difference!
