

## Warning: Severe Electric Overload

Because of the world we live in, our harmonic electric bodies are experiencing “chaotic electric” interference on a daily basis. The result is threefold: 1) the normally alkaline body goes acid, the perfect terrain for disease to thrive. 2) inflammation sets in, causing blocks to wellness. 3) cell walls become scarred preventing the *hydration needed to amp hydro-electric energy for cellular self-repair*.

### Electropollution is here to stay

Close to home we have everything from the clock radio beside our bed to hybrid cars, hospital stays, airplanes and airports, military installations, high tension wires, cell towers, electric blankets, waterbeds and tanning beds, TV's, hair dryers and shavers, and on and on. And of course wireless technology with its streaming WIFI and WIFI max is a giant offender.

Now another problem. We live in a soup of electro-magnetic radiation stretching through the Infinite Energy Field with periodic cosmic hits from **solar flares** in 2000. An even more dangerous degree of radiation exposure is caused by the more recent **coronal mass ejections** (CMEs). The level of radiation was released on the planet in June 2012 with its Ultra Violet B-rays. There has been slow recognition of the problem which can cause “radiation sickness and retina damage through 2013. The sun’s blue-white brilliance and extreme heat are its warning signals. Check out the websites at NASA NOAA and SpaceWeather.com for more information.

Because electric is cumulative over time, symptoms may initially be mild. However, eventually symptoms can become seriously disabling, often being (mis)labeled as allergies, migraines, chronic fatigue, fibromyalgia or even an “auto-immune disorder”, when it’s actually a *short circuiting of the harmonic electric body*.

Symptoms may be many and varied. Here are some of the most common:

- Depression/anxiety, random thoughts, "mind chatter"
- Mood swings/out-of-character actions
- Brain fog/confused thinking/headaches
- Unexplained fatigue
- Discomfort when near electrical devices
- Irritation of mucus membrane (sinus/allergies) and nervous system (hypersensitive to tastes, smells, lights, noise)
- Acidic system/digestive upset
- Colon malfunction
- Muscles aches
- Respiratory distress
- Heart irregularities/pain

### **Is protection possible?**

First it must be understood that electrosensitivity is caused by the *irritation or sensitizing* of not only the mucous membranes throughout the body, but the entire nervous system. The resultant symptomology makes it extremely uncomfortable to live in this electric world— and often life-threatening once the accumulated electric reaches "critical mass".

Once the cells are cleansed of all chaotic electric and/or electromagnetic radiation from its many sources, it needs protection to keep it clear.

Protecting the human harmonic electric body is difficult at best. Avoidance is suggested though not actually possible. The best suggestion is therapeutic jewelry (i.e., a "deflecting" piece of jewelry). Since most therapeutic jewelry "collects" electric, it soon provides no protection at all. Although these pieces prevent further contamination they do not address electric that has already accumulated in the cells. Unfortunately it's only after electric has been neutralized that the body can begin to repair cellular damage.

The neutralizing of chaotic electric is easily and completely addressed by Bioenergetics, the new energy medicine. There is a simple system that is fast, easy to use and specifically designed to clear electric overload (EO). More information at (<http://altwaterstech.com/category/electric-overload/>)

# Therapeutic Jewelry

Enough information has come to light over the past decade to cause concern about the potential damage to the human body of electromagnetic radiation (EMR), and even mor incidious, extreme low frequency waves (ELF).

There are many different types of what is known as “therapeutic jewelry” on the market with plenty of hype about protection against many kinds of electric which surround us in our modern society.

Energy Intuitive, Carol Keppler, has researched the best selling pieces and found that after a short time most no longer were protective. The problem with most was the inability to deflect electric. These products *accumulated electric to the point they were no longer protective*, leaving one with a false sense of security.

It is also important to know that *therapeutic jewelry does not clear chaotic electric from the cells*. It's not yet proven that there are any products that do. AltWaters Technology is a leader in this field with a FourStep System for *neutralizing electrical overload including harmful radiation and then the use of the Maltese Medallion to prevent subsequent electric/EMRs*. For more information visit (<http://altwaterstech.com/>)

Of the thirteen characteristics rated, only one of the many pieces of jewelry reviewed passed the test. Therapeutic jewelry “A” and “B” are the two best known and most expensive pieces.

Protecting the Harmonic Electric Body	Maltese Medallion	Therapeutic Jewelry A	Therapeutic Jewelry B
		<i>(Collects until Helpful)</i>	<i>(Collects until Helpful)</i>
Screens negative ELF signals(non-ionizing radiation)	% DEFLECTS 100%	% DEFLECTS Then: 0%	% DEFLECTS Then: 0%
Screens radiation (ionizing)	100%	0%	0%
Screens solar flares	100%	0%	0%
Screens geopathic stress	100%	0%	0%
Screens electro-magnetic fields	100%	0%	0%
Radiates 8Hz signal similar to the Earth’s 7.9Hz	100%	0%	0%
Allows body to operate withinits own natural frequency range	100%	0%	0%
Increased nerve cell communication	90%	0%	0%
Living tissue remains functional	90%	0%	0%
Allows unclumping of lymphand blood cells for:	10%	0%	0%
• Helps move nutrients into cells/tissues	10%	0%	0%
• Improves repair capacity	10%	0%	0%
