

# The 5 steps in the spiral from wellness to chronic illness...

## an introduction to the theory of root cause

*Carol Rose Keppler, M.EI*

*Master Energy Intuitive*

Let's start with a basically healthy adult/child; what has to happen to a person before illness sets in?

Step 1. **Repair Loop (immune system) is damaged by:**

- Body trauma
- Emotional trauma
- Toxins
- “Chaotic” electric / including Ionizing Radiation / Non-Ionizing Radiation
- Generational issues/Past Life
- Dark energy

Step 2. **Cellular Repair Response System (CRRS) is activated** send *extremely acidic* cytokine hormones to the site of “injury”.

Step 3. **CRRS normally turns “off”** as microbes and dead cells are disposed of by the acidic cytokines. Often the “*damage*” is caused by *toxins, electric or even emotional trauma* and therefore no specific “*site of injury*”; it now becomes systemic with acidic cytokines pumping into the system for years—sometimes never turning “off”— causing organ/system malfunction.

Step 4. As the **pH becomes more and more acidic**, homeostasis ( the body’s ability to return to normal function), is not attainable until alkalinity is restored. An acid system provides the perfect terrain for microbial activity and yeast/fungus overgrowth, causing further breakdown of malfunctioning cells in preparation for *the death of the body*.

An acid system is always in a breakdown or “catabolic” mode; an alkaline system puts the body into an anabolic or rebuilding mode for *continual cellular self-repair*.

Step 5. **Individual organs or entire systems become symptomatic** and begin to shut down causing the patient to seek relief through:

- “Procedures”/operations (more body trauma/emotional trauma)
- Medications (additional chemical toxicity)
- Electric therapies (added chaotic electric)

**Fact:** *A damaged Repair Loop* ultimately causes acidic pH, the perfect terrain for all disease.

**Fact:** Once health has been thus compromised, miasms of toxins stored in the body’s Infinite Energy Field tend to leach down into the physical body including among others, not only toxins and electromagnetic radiation, but some of the most insidious diseases with “no known cause/no known cure”: chronic fatigue syndrome, obsessive compulsive disorder, fibromyalgia, Lyme Disease and some of the most serious mental disorders.

These fields are capable of cleansing with the subtle frequencies of energy medicine.

**Question:** **Are we dealing with step 5 – damage control/crisis mode when we should begin with step 1 “root cause”?**
